SAE AMS 3611E

SOCIETY OF AUTOMOTIVE ENGINEERS (SAE) AEROSPACE MATERIAL SPECIFICATION (AMS)

3611E for GENERAL PURPOSE POLYCARBONATE PLASTIC SHEET

AZCARB Polycarbonate sheets are typically used for making parts, such as aircraft heating ducts, cabin liners, fairings, storage boxes and decorative laminates requiring high impact strength and high dimensional stability. It should be noted that polycarbonate is incompatible to some solvents and each application must be carefully evaluated on its own merits

The specification also requires lot testing of material for U.S. Military procurement. AZCARB GP and AZCARB UV, although meeting or exceeding SAE AMS 3611E, are not typically lot tested to all the parameters contained within this standard. Contact AZ Polymers with any additional questions.
